SUMMARY

Dedicated Computer Science Engineering student at VIT Bhopal with a strong focus on Backend and Full-Stack Java Development. Proficient in building robust APIs, scalable microservices, and enterprise applications using Spring Boot and modern frontend technologies. Active competitive programmer on Codeforces and LeetCode, passionate about software architecture, clean code, and solving complex algorithmic challenges.

TECHNICAL SKILLS

- **Backend & Frameworks:** Java, Spring Boot, Spring MVC, Spring Data JPA, Hibernate, RESTful Web Services, Microservices Architecture
- **Frontend & Web:** JavaScript, TypeScript, Angular, React.js, HTML5, CSS3, Thymeleaf
- **Databases:** MySQL, PostgreSQL, MongoDB, Redis
- **Tools & DevSecOps:** Git/GitHub, Maven, Gradle, Docker, JHipster, Postman, JUnit

EDUCATION

VIT Bhopal University Aug 2024 – May 2028

B.Tech in Computer Science & Engineering — **CGPA: 8.37 / 10.0**

- **Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Software Engineering

PROJECTS

Spring Boot Enterprise Examples | *Java, Spring Boot, JPA, Redis, Docker* GitHub Link

- Contributed to and leveraged a comprehensive repository of Spring Boot implementations to build modular, production-ready backend services.
- Implemented complex data access layers utilizing Spring Data JPA and MyBatis, and integrated NoSQL solutions like MongoDB and Redis for optimized data caching.
- Containerized application environments using Docker and Docker Compose to streamline testing, ensure cross-environment consistency, and simplify deployment workflows.

Intrusion Detection System (IDS) | *Java, Spring Boot, REST API, MySQL* GitHub Link

- Developed a robust Java backend system designed to monitor and analyze network traffic logs for suspicious activities and potential security breaches.
- Engineered real-time logging and alerting mechanisms using Spring Boot, ensuring critical security events are accurately persisted in a relational MySQL database.
- Designed a secure REST API architecture to serve threat-detection data to frontend dashboards, enabling network administrators to visualize traffic patterns effectively.

JHipster Microservices Platform | *Java, Spring Boot, React/Angular, Kubernetes* GitHub Link

- Leveraged the JHipster development platform to rapidly generate, configure, and deploy modern web applications and resilient microservice architectures.
- Integrated a high-performance server-side Spring Boot stack (Java) with a sleek, modern client-side UI (Angular/React), ensuring excellent test coverage and separation of concerns.
- Utilized cloud-native principles by configuring infrastructure as code, setting up automated CI/CD pipelines, and preparing the application for scalable deployment via Docker and Kubernetes.

EXTRACURRICULARS & PARTICIPATIONS

- **National Hackathon Finalist** — SIH & India Innovates
- **Core Member**, Linpack Club, VIT Bhopal
- **Interests:** Cricket and Technical Problem Solving
- **Competitive Programming:** Codeforces Rating (1000+)
